

National Initiative on Skill Integrated Higher Education (NISHE)

Implementation of Apprenticeship Embedded Degree Programs (AEDPs) in Madhya Pradesh from AY 2024-25

1. Introduction

1.1 India has been witnessing a rapid economic growth in a multi-sectoral pattern across industry and service sectors. While the growth has multiplied and diversified exponentially, it is the employment aspect that has not kept pace with the growth momentum. Employment is the significant outcome for the bulk of the college-going youth. However, the critical component of employability determines employment prospectus and this is an area of concern, more so for the 43,000 Conventional Degree Colleges in the country and within them, the Government Degree Colleges (GDCs)

1.2 The main reason why 55 lakh students out of the annual 1 lakh non-professional degree pass outs in India remain unemployed & unemployable is that industry-demanded skill-sets are not embedded in the college curricula. There is a dire need to transform the curricula of B.A., B.Sc. and B.Com. through the introduction of new and industry-aligned courses with hands-on work exposure integrated into the curriculum. This work exposure should be in the form of apprenticeship during the period of learning. A transformatory approach of this nature would equip students with professional abilities and make them industry ready

1.3 Past efforts have been undertaken in the states of Telangana, Andhra Pradesh, Uttar Pradesh and Himachal Pradesh, and as of now more than 50 colleges mentored by the Centre for Research in Schemes and Policies (CRISP) are implementing Apprenticeship Embedded Degree Programmes (AEDPs). The Logistics, Retail, and Tourism & Hospitality Sector Skill Councils (SSCs) are additionally implementing such programmes in a combined set of about 100 more colleges. Apprenticeship linkage has been successful in all colleges.

2. State Overview

2.1. Madhya Pradesh's demographics and social characteristics offer a unique potential for economic growth through skilled workforce development. The working-age population (aged 15-59) is expected to increase from 43.4 million in 2012 to 48.7 million in 2017. 52.9 million by 2022. Madhya Pradesh's

manpower supply varies by location and gender. Dhar, Bhopal, Indore, Gwalior, Sagar, Katni, Rewa, and Satna districts are seeing significant human resource expansion.

Tribal regions such as Mandla, Dhar, Jhabua, Sidhi, Khargone, Seoni, Shahdol, and Chhindwara require special attention due to seasonal work-related migration caused by socio-economic backwardness and a lack of sustainable

National Initiative on Skill Integrated Higher Education (NISHE)

local livelihood/employment opportunities. Given Madhya Pradesh's rural economy, women play a crucial role in capacity building, with a significant share of rural females working in agri-related fields. There is a need to address industrial considerations for hiring women in medium-small manufacturing firms.

The state's human resource requirements vary significantly across geography and sectors. Priority sectors for personnel development in the state include construction, mining, textiles and apparel, electricity, healthcare, education, and agriculture (e.g., dairy, poultry farming, and horticulture). The state's developing sectors, including IT/ITES, Renewable Energy, and Logistics, have the potential to provide significant employment. Madhya Pradesh's key business centres, such as Bhopal, Indore, Jabalpur, Ujjain, and Gwalior, are likely to produce considerable employment between 2012-22. Focus districts for workforce requirements in elementary, secondary, and tertiary sectors are:

Sl. No.	Sector	Districts	Activities Pursued
1.	Primary(Agriculture and Allied)	Dhar, Ujjain,Chindwara, Jabalpur, Hoshangabad, Guna and Ashok Nagar, Dewas, Indore, Shajapur, Vidisha, Sagar, Ratlam, Sehore, Mandsaur, Khargone	<u>Agricultural Crops:</u> Rice, wheat, maize, mustard, sugarcane, soyabean, jowar and bajra. <u>Agri-Allied Crops:</u> Horticulture and Sericulture <u>Agri-Allied Activities:</u> Diary, Poultry, Piggery, Goatery and Fisheries
2.	Secondary(Manufacturing)	Indore, Bhopal, Jabalpur, Ujjain,Gwalior, Dhar, Satna, Dewas, Sagar, Khandwa	Agro-products, Chemical and Chemical Products consumer goods, drugs and pharmaceuticals, mines and minerals, manufacturing and textiles sectors
3.	Tertiary(Services)	Indore, Bhopal, Jabalpur, Gwalior, Ujjain,Sagar, Satna, Ratlam,Chindwara, Rewa	Trade, Retail, Hospitality and Tourism, Financial Services, Healthcare, Transportation and Logistics, Education

The unorganised sector employs a large number of unskilled people, and the study's limited coverage leads to a surplus of personnel in this area. Excess supply in the high skilled category may lead to limited job prospects inside the state, leading to skilled worker migration from 2012-22. The lack of congruence between courses and industry demands, as well as inadequate institute quality, provide challenges for highly qualified graduates' employment. To address the issue of poor employability among graduates, it is necessary to provide appropriate upskilling based on local industrial requirements. This will assure the availability of industry-ready workforce.

The youth aspiration study/research by KPMG shows a significant gap between student aspirations and accessible work prospects in the state. To recruit talent, industries such as retail, construction, agri-allied activities, textile, transportation, and logistics must promote a favourable image and offer suitable working conditions and benefits. Construction, transportation, and logistics industries provide job prospects for skilled workers outside of the state. Youth in IT/ITES and healthcare industries have limited job opportunities, leading to white collar migration to southern regions.

3. Industry Overview

3.1. The state is witnessing emergence of new employment generating sectors including allied services like security services and housekeeping. In such cases skill development becomes a necessity for those who are seeking employment in the new generation sectors. With proper skill training it can be expected that it will result in realignment of workforce distribution in the workforce.

Sl. No.	Sector	Growth Regions
1.	IT & ITes	Indore, Bhopal, Gwalior, Jabalpur
2.	Renewable Energy	Gwalior, Indore, Bhopal, Jabalpur and Rewa for solid waste based power. Rajgarh, Neemuch, Mandsaur for solar power. Narmada Basin area for geo thermal energy. Ratlam, Dewas for wind energy
3.	Tourism	All major tourist destinations in Madhya Pradesh have potential for the growth of Rejuvenation, Yoga & Meditation, Diseases Management , ayurvedic treatment and spa industries.
3.	Logistics	Multi Modal Logistics Hub –Pitampur, Composite Logistics Hubs -Bia, Ujjain, Jabalpur Construction of Modern Warehouses -Balaghat, Katni, Shahdol, Shivpuri, Morena . Operating & Maintaining CPC – Indore Composite Logistics Hub –Hoshangabad

According to the National Skill Development Report 2021-2022, the state has urgent need of professionals in the following sectors. **The table below details the requirement in the year 2021-2022**

Sl.No.	Sector	Required Manpower
1.	Education and Training	3,80,800
2.	Banking and Financial Services	9,64,300
3.	Communication	6,39,700
4.	Hospitality	3,30,900
5.	Retail	1,783,700
6.	Transportations and Logistics	9,62,100
7.	Healthcare	1,87,800
8.	IT&ITES	1,31,700
9.	Construction	11,35,000
10.	Manufacturing of Electrical Products	9,500

National Initiative on Skill Integrated Higher Education (NISHE)

11.	Textiles	74,800
12.	Auto and Auto Components	24,900
13.	Mineral Processing	50,000
14.	Construction Based Material	28,300
15.	Chemical & Chemical Products	90,500
16.	Paper & Paper Products	12,900
17.	Fabrication	21,500
18.	Food Processing	170,600
19.	Rubber and plastics products	26,800
20.	Pharma & Medicinal Products	7,600
21.	Agriculture Allied Activities	782,000

4. Approach Towards Madhya Pradesh

4.1. Madhya Pradesh has potential growth coming its way with the new generation sector taking a boom in the state which will be an opportunity in terms of generation of skilled manpower for the same. Hence, as a policy & implementation objective, about 82 colleges in the state with a rational district-wise spread can be identified as a pilot for a cohesive effort where every identified college offers skill-embedded degree programs. The courses would be degree courses integrated with industry demanded skills woven into the curriculum with apprenticeship/internship linkage as per the UGC stipulated credit structure and guidelines. Alignment of the colleges with industry would establish a relationship where dynamic changes in curriculum at pace with industry changes are affected, with the entire skilling component being imparted in accordance with the National Skill Qualification Framework (NSQF), regulated by the National Council for Vocational Education and Training (NCVET) under the umbrella of the Ministry of Skill Development and Entrepreneurship (MoSDE). For the education system in India, especially colleges, the most direct, sustainable and credible industry-connect will come from the SSCs, whose mandate is to provide skilled work force to the industry group they represent. Cutting edge training is facilitated by the SSCs through Qualification Packages (QPs) designed based on National Occupancy Standards (NOS). Although there is an SSC for every industry vertical in the country, in this exercise, we are considering 7-8 SSCs which are active in the college system.

As per extant UGC guidelines and the flexibility provided therein, skill integration into education can take place through:

- (i) Full-fledged degree programs
- (ii) 35-40 credit elective courses
- (iii) 1-year diploma courses

National Initiative on Skill Integrated Higher Education (NISHE)

Examples of full-fledged degree programs would be BBA (Logistics), BBA (Retail), B.Sc. (Life Sciences), BBA (Healthcare), B.Sc. (Tourism & Hospitality) etc. Industry Apprenticeship would be an integral part of such courses.

4.2 35-40 credit elective courses during second/third years in sectors like Green Jobs, Electronics, Media & Entertainment, Logistics, Agriculture etc., are also possible. On-the-Job Training (OJT) would be part of such courses.

5. Steps and Timelines

The State Government, State Higher Education Council, CCE, Universities and Colleges have to work in tandem with CRISP for the smooth launch of AEDPs in the state. The following timelines are desirable to be maintained.

S.No.	Activity	Date for Completion	To be done by
1	Meeting with Govt., VCs, Colleges & SSCs	26.02.2024	CRISP & State Govt.
2	Signing of MoU between CRISP & State Govt.	15.03.2024	CRISP & State Govt.
3	Curriculum Finalisation by CRISP and UGC Officers	15.03.2024	CRISP
4	Communication of Approved/ Scrutinized Curriculum to Universities	16.03.2024	CRISP
5	Communication of Selected Colleges & AEDPs to CRISP	15.03.2024	State Govt
6	SSCs signing individual MoUs with Affiliating Universities or Autonomous Colleges	15.04.2024	State Govt., SSCs & Colleges
7	Approval by Universities BoS and Academic Council to selected colleges	30.04.2024	State Govt./Universities
8	Training of Teachers	01 to 31 May	SSCs / CRISP
9	Identification of Industries/Establishments for providing Apprenticeship	31.05.2024	SSCs
10	Classrooms & Labs Preparation	15 April to 15 June	Colleges
11	Information, Education & Communication (IEC) Programs (Coinciding with Admission Process)	15 June to 15 July	State Govt.
12	Preparation of Admissions Portal	01 to 15 July	State Govt.
13	Start of Classes	01.08.2024	Colleges

5.1 NISHE: Proposed Numbers for 03 AYs

The following table highlights the proposed AEDPs spread that CRISP envisages over a three-year horizon, sector-wise and state-wise. The sector-wise college numbers proposed for Madhya Pradesh can be seen in the relevant row. The college numbers (with a class strength of 60 students each) have been projected after discussions with the SSCs on the estimated apprenticeship potential.

5.2. The table below displays the sector-wise projected number of colleges for the state and students to be targeted to be implemented over the next three academic years.

Courses	Proposed No. of Colleges	Proposed Number of Students
IT & ITes	15	900
BFSI	20	1200
Logistics	10	600
Tourism & Hospitality	10	600
Healthcare	10	600
Retail	5	300
Life Sciences	5	300
Media & Entertainment	2	120
Fashion Designer	2	120
Electronics	0	0
Capital Goods	0	0
Total	87	4740

6. Roles of Different Stakeholders

The exercise of introducing AEDPs in Madhya Pradesh colleges needs to commence from the academic year 2024-25 for the benefit of employability of students and enabling them to capture the job opportunities across the state and country. In this exercise, the roles of different entities are very clear and laid out as follows:

6.1. Sector Skill Councils (SSCs)

- i. The chief role of the SSCs is to bring industry standards into the skill component of the curricula, set occupational standards, provide course curriculum & Qualification Packages (QPs) for training, tie-up apprenticeship and carry out assessment & certification of students. The presence of the top companies of that sector in the Governing Body of each SSC provides a direct industry connect which is leveraged and utilized for demand-based skilling, apprenticeship, and employment. They are regulated by MoSDE through the National Skill Development Corporation (NSDC).
- ii. SSCs will provide customization of the curriculum to evolve a basic degree or elective or diploma to cater to college-specific requirements.
- iii. All SSCs have the capacity for carrying out Training of Trainers (TOTs) or Teachers' Training which would be the first exercise in Madhya Pradesh after course choice by colleges and before launching the courses. The SSCs would help to select trainers or assign their training partners to a college only in case no suitable faculty is available for training. The fee chargeable by the SSCs for Training of Teachers is as per the prescribed common norms and is usually added to the annual fees of the student or met by the institution.
- iv. The fee charged by SSC for the entire set of services will be more than recovered students during the period of apprenticeship.

6.2. Colleges/Universities

- i. The chosen colleges would have the responsibility of providing classroom space for the new programs as well as Wi-Fi connectivity. Certain sectors would require a laboratory facility for which the college may have to carry out some site preparation & purchase equipment so that the SSC can function. This will be a cost to the College/University undertaking certain courses like Healthcare, Hospitality, Electronics, Capital Goods, Apparel etc. They would also need to identify some of their own faculty for a Teachers' Training exercise. During the annual admission process, college principals would need to impart adequate publicity to the new skill-embedded courses on offer, highlighting their job relevance, apprenticeship & employment potential and prevent any awareness gap. SSCs will participate on their own whenever required by the State Government in awareness generation activities, so that students across the state are well informed about the prospects of various skill-embedded courses. This can be carried out during the pre-admission period leading to counselling and course choice.
- ii. College Principals would need to adopt a progressive and dynamic approach to the education system in their respective colleges and also motivate suitable faculty in their colleges to re-orient their minds & teaching methods to such skill-embedded courses which are very different from usual pedagogy. Principals must also be open to hiring contract faculty or trainers for the courses they may opt for in this sphere.
- iii. State Universities may provide authorization to the affiliated colleges for offering skill-embedded courses. These courses are in line with UGC guidelines. Such an authorization by the Universities to their Colleges may be omnibus/generic and the colleges may not be required to seek approval of the University for every new course in future.
- iv. State Universities may dedicate some space and manpower for setting up Centers of Excellence/ Common Facilities in selected sectors and prepare themselves for functioning as a Hub and Spoke model for higher end skills in favour of their affiliated colleges. Several SSCs/Industry Partners are eager in this regard and quick, facilitating decision making may result in several such Centers across the education landscape of Madhya Pradesh. This is a sustainable direction in which multi-sectoral, permanent industry-connect can be secured with minimal cost to the Government.

6.3. State Government of Madhya Pradesh

- i. The State Higher Education Department/Higher Education Council may accord approval/direction to all State Universities to undertake AEDPs by themselves and their affiliated colleges. Autonomous Colleges would be free from such an approval. This may be essential in states where a State University may require government approval to authorize its affiliated colleges to undertake new skill-embedded courses.
- ii. The State Government has a very instrumental role to play in inviting high-CSR IT, Engineering and Service Sector Companies to adopt certain State Universities and Women's Colleges. Microsoft, Google, TCS, etc., can have focused interventions in certain educational institutions in providing labs, laptops, etc. CRISP opines that most Companies would participate in long-term curriculum provision and mentoring, provided the institutions come up with clear-cut proposals and have an interactive engagement. There are examples in other states where colleges have tied up with IT companies for a 3-year IT course where the Company provides the entire content

National Initiative on Skill Integrated Higher Education (NISHE)

and guaranteed placement. Such an effort can be initiated in Madhya Pradesh for about 10 colleges. Companies do respond positively to a government-led initiative.

- iii. The entire process of college-course mapping, earmarking classroom and lab facility, identification of teachers for training/hiring trainers, finalizing course content with the SSCs, MoUs with the SSCs and awareness generation before admission process must be completed before formal admissions start. To meet such timelines, it is essential that the State Government/Universities give the go ahead to the identified colleges quickly so that college-course mapping can be concluded as per timelines indicated in point number 3.
- v. The Mapping of Colleges to courses must be rational and crowding of colleges in one or two sectors should be avoided.
- vi. Govt colleges would require flexibility in hiring of teachers on contract basis in case no faculty is available for AEDPs. This is a specific area for the government to facilitate.
- vii. If the Govt of Madhya Pradesh can earmark a budget of Rs. 5 crore only, at least 30 Govt. Colleges can be assisted in setting up laboratories to undertake AEDPs in healthcare, hospitality, electronics and life sciences. This will be a one-time investment

FAQs on AEDPs

1 What are Sector Skill Councils (SSCs)? Are they government or private? Why are they charging money from colleges?

Ans: Sector Skill Councils (SSCs) are formed by the Ministry of Skill Development and Entrepreneurship (MSDE) along with leading industries in that sector. The National Skill Development Council (NSDC) of the MSDE has formed the SSCs along with the Industry to develop the occupational standards and to pioneer high quality skill programmes. More details are here: <https://nscindia.org/sector-skill-councils>

SSCs are Section 8 companies operating on no-profit-no-loss basis. They have to generate income for running their operations. They don't get Govt subsidy for their running expenses. So, they charge fee as per common norms for their programme interventions. All these are under the strict control of the Ministry of Skill Development, Govt of India.

For the Govt colleges, CRISP made a request to charge a reduced fee since the students are from economically poorer sections, while private colleges are charged the usual fee. This fee is for the full range of services of the SSC, covering curriculum, teachers training, apprenticeship linkage and assessment.

2 How are SSCs linked with the Industry Experts?

Ans: SSCs are industry bodies represented by the industry leaders and therefore are directly linked with the industry experts.

3. Who are preparing the curriculum for AEDPs i.e., SSCs or Industry?

Ans: NSDC supervises the curriculum preparation by the SSCs. All the job role-based qualification packages used in the curriculum are examined by the National Council for Vocational Education and approved.

4. Who will award the Degrees i.e., Universities or SSCs or Joint Degrees?

Ans: Degrees are awarded only by the Universities.

5. What is the validity of the Degrees awarded by the SSCs or Joint Degrees? Are these Degrees valid for Government Exams and Foreign Studies?

Ans: SSCs don't award degrees. They only facilitate the creation of curriculum, transaction and also assessment. Only Universities are authorised to award degrees. The Degrees are as per UGC approval and valid for Government Exams and higher studies.

6. What is the difference between AEDP and Skill-Embedded Degree Program?

Ans: in AEDPs the Apprenticeship is a mandatory part of the course curriculum. Skill- embedded Degree courses may not have apprenticeships.

7. Why can't we implement the 3+3 formula (3 days classes and 3 days apprenticeship) for all the AEDPs?

Ans: Mainly because of want of industries/establishments nearby. It is not possible to travel to metro cities for 3 days a week for students in interior districts. In such cases, the Apprenticeship would be continuous for one or two whole semesters towards the end of the course.

8. Can we implement the AEDPs as part of our Regular Degree Programs? For example, can we implement Retail for 02 semesters in BBA or B.Com.?

Ans: It has to be a complete course of 3 years to get a degree of BBA (Retail).

Apart from this, we are trying to introduce subjects (from retail and such other areas) which can be taken as optional papers. But in that, apprenticeship will not be available.

9. Can we implement the AEDPs as one year diploma programs with apprenticeship?

Ans: No. We need full 3 years to study the subject and attain skills as per requirements of the industry.

10. Do we have any employment-oriented short term training course for the students which the colleges can implement?

Ans: We don't believe in short cuts. The skill has to be learnt in full for being of any use in the market.

11. Can we implement skill-oriented online certification courses directly or in association with the industry?

Ans: There are some skill-oriented online courses available to everyone. But we believe that learning of skill has to be hands-on. So, we are not supporting such ventures.

12. What is the difference between Internship and Apprenticeship?

Ans: Internship is informal. Apprenticeship is formal. Apprenticeship is governed by a Central Act, is a contract between the company and student. It carries stipend as per prevalent minimum wage rate.

13. What is the difference between Apprenticeship Training and On the Job Training?

Ans: Only difference is that Apprenticeship is governed by a Central Legislation. Apprenticeship is for a minimum period of 6 months while on- the- job training is of much shorter duration.

14. What are the advantages / benefits of implementing AEDPs for students and colleges?

Ans: You will prepare industry- ready students with skill sets who will walk into the jobs after their degree programme. Employability is 100% (unless the student fares badly)

15. What is National Apprenticeship Promotion Scheme (NAPS)?

Ans: This is a scheme of Govt of India launched to encourage industries to take Apprentices in their establishments. Under this, Govt reimburses 25% of the stipend paid to the Apprentices by industry, subject to a maximum of Rs. 1,500. It is paid as direct benefit transfer to the account of the Apprentice.

16. Are the colleges implementing AEDPs covered under the NAPS? How can the colleges register under the NAPS?

Ans: Colleges need not bother about NAPS. That would be taken care by the industries/establishments who need to enrol under NAPS. NAPS is an arrangement between Govt and the industrial establishments.

17. How can colleges design the industry-oriented curriculum by inviting the Industry Experts directly i.e., by excluding the SSCs?

Ans: It is possible but difficult. It needs dedicated work by both the college and the industry working together. There are some such examples like Dayalbagh university. But it is nearly impossible to replicate it on scale since such skill expertise is not available with the colleges.

18. What will happen if the University's Board of Studies (BoS) doesn't give approval after starting the AEDP?

Ans: Colleges need to take this permission from universities in advance. Govt of Telangana is facilitating this only for the first year. It is an important responsibility of the college/ University/ Government.

19. What should colleges do if the students don't receive the promised compensation during their apprenticeship and students aren't placed?

National Initiative on Skill Integrated Higher Education (NISHE)

Ans: In the unlikely event of apprenticeship stipend not being paid to student, there will be a complaint redressal mechanism set up by Govt of Telangana for receiving and redressing such grievances. Placement however is the prerogative of industry, which is based on their requirement and merit of a successful apprentice.
